

COREY COLE

Seattle, WA · ccoreycole@gmail.com · (201) 245-3660 · <https://coreycc.com>

PROFILE

Senior Full Stack Software Engineer

Founding engineer and generalist who ships across the full stack, from data pipelines to polished UIs.

WORK EXPERIENCE

Founding Engineer, Full Stack at a16z backed seed stage startup

Seattle, WA

Chestnut

April 2024 - Present

- Shipped >1.7k PRs >2.3k commits across >6k files in <2 years (if you care around 1M net lines of code)
- Built full stack features for payouts, bonuses, compliance, onboarding, and data ingestion pipelines
- Designed and built an agentic pipeline for researching the codebase and proposing code change plans
- Self-hosted an internal OpenClaw Slack bot for engineering management, product research, and Linear ticket enrichment
- Fixed bugs and improved code quality in parallel with feature work using LLM tooling

Senior Software Engineer, Cofounder of Omnicom.ai (microphone sync app)

Seattle, WA

Kernel Labs

Jan 2020 - Dec 2023

- Built real-time (<60ms) audio signal processing system to synchronize and echo-cancel in C/Rust
- Delivered hardware integration for corporate contract with Hewlett-Packard (HP) in C/GStreamer
- Shipped contacts+notes voice assistant app (Ciremi) in React Native Expo using GPT-4 via OpenAI API
- Built and maintained full stack apps for 1000s of users in Typescript/React Native/AWS Lambda/Fargate/EC2
- Quantized machine learning model for real-time audio signal inference on Android
- Mentored junior developers and enhanced engineer productivity by simplifying codebases

Software Engineer, Cofounder of Halloo (Alexa/Google Home app)

Seattle, WA

Kernel Labs

Apr 2018 - Jan 2020

- Built Alexa & Google Home voice social network (like Houseparty) using Typescript/Python/AWS
- Built Chrome Extension for de-noising audio with in-house ML model using JavaScript and Python
- Developed an internal analytics, logs, and error browsing tool to streamline access to critical data

Software Engineer, Cofounder

Seattle, WA

BellHapp Inc

Sep 2015 - May 2018

- Built restaurant mobile web app for the dine-in experience of ordering and real-time staff messaging
- Bootstrapped with 1-2 engineers; owned design and UX; led weekly meetings & task organization

Research Demo Builder for Dan Suciu

Seattle, WA

University of Washington, Computer Science & Engineering Department

Sep 2015 - May 2018

- Built best-in-conference demo for VLDB 2018 and demo'd at ACM SIGMOD 2018
- Developed a SQL-based framework for drawing causal inference using Python and Postgres
- Visualized and fixed bias in OLAP queries using Angular and Typescript

Software Engineer

King of Prussia, PA

eBay Enterprise

Jun 2015 - Sep 2015

- Built Magento e-commerce front-end linked to our legacy back-end as a proof of concept in PHP/SQL

SKILLS, TOOLS & EXPERIENCE

Languages: Go, SQL, Typescript, Python, C, Rust
Backend: Temporal, Postgres, Datastar, SSE, AWS, EC2, Lambda, Docker, SQLite, redis, GStreamer
Frontend: React, Next, Tanstack Query, Proto Connect, Tailwind, React-Hook-Form, Zod, Shadcn
Tools: Neovim, Claude Code, OpenClaw, Linear, Excalidraw, Figma

EDUCATION

University of Washington, Dean's List

Seattle, WA

Bachelor of Science Computer Science custom track in Informatics, Math minor

Sep 2013 - June 2017
